Re: Class III, Regular Operation and Maintenance Certificate
Woodland Pond Dam, Inv. No. 04129

Dear Mr. Schnell:

The Virginia Soil and Water Conservation Board approved a Regular Operation and Maintenance Certificate for your dam on May 19, 1993, under the Dam Safety Act and its regulations.

The certificate is based on your application, which includes operation and maintenance plans and inspection schedules, a reinspection report or inventory report or as-built report prepared by a professional engineer, and an emergency action plan.

The Dam Safety Act (Section 10.1-604 et seq., Code of Virginia) provides that, "No one shall maintain a dam which unreasonably threatens the life and property of another." Therefore, the plan submitted with your application is to be followed for routine operation and maintenance and whatever emergency situations occur.

Please refer to Section 3.1 of the regulations for the required actions during the term of the certificate.

The certificate and appropriate data are enclosed. If there are any questions, please contact me at (804) 371-7536.

Sincerely,

Joseph S. Haugh, P.E.
Chief, Dam Safety
